

problem-3 (user display)

Problem

Description

- Please do a default export of the all the components

You have 3 components

Title.jsx

- You need to create a component called Title. This component will need to have a `H1` tag, and have its text content as `Users Display`
- add `color:teal` to the title .

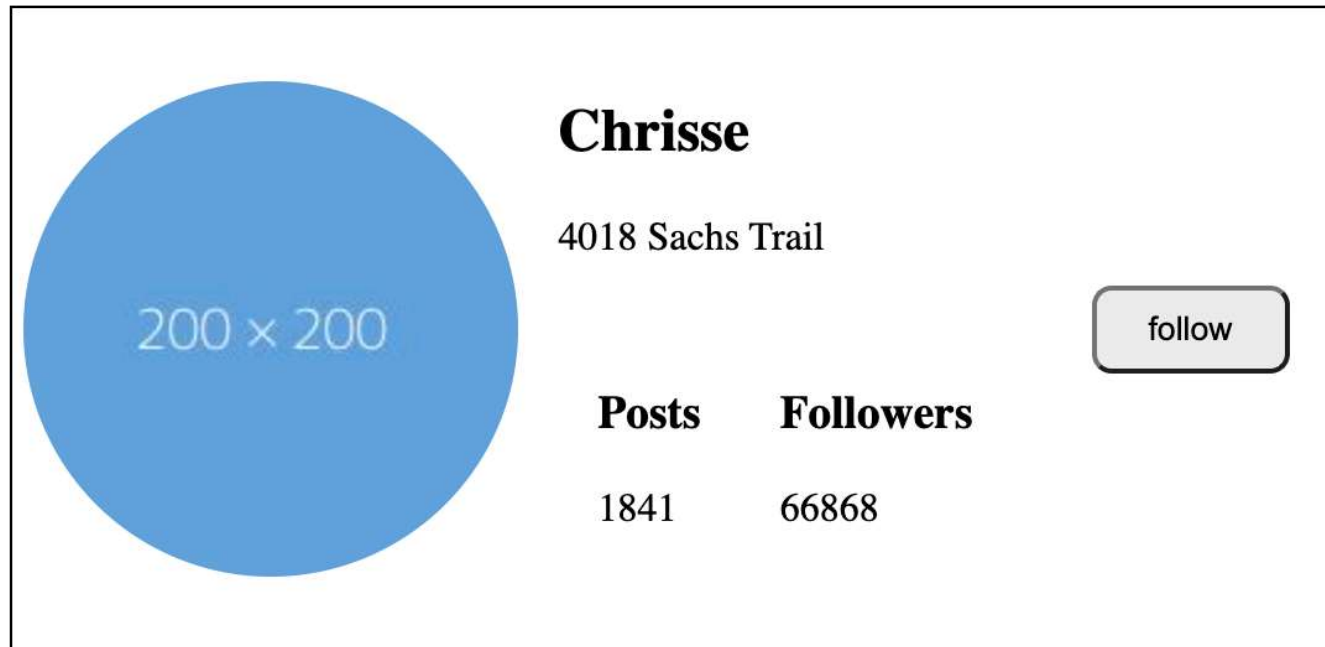

UserCard.jsx

- You need to create a UserCard component which accepts the following properties / props
 - name
 - avatar
 - posts
 - followers
 - address
- You need to create an image tag, with src as `avatar` , and the alternate text is same as `name` .
This image should be rounded as shown below (Hint : use border radius property)

- display the other recieved props as following
 - name in `h2` tag with data-testid = `user_name`
 - For example this how you can add the data-testid `<h2 data-testid="user_name">{name}</h2>`
 - address in `p` tag with data-testid = `user_address`
 - posts in `p` tag with data-testid = `user_posts`
 - followers `p` tag with data-testid = `user_followers`
 - `Posts` heading in `h3` tag (refer image)
 - `Followers` heading in `h3` tag (refer image)
- the component should have a button with a default text as `follow`
- on clicking the button text toggles between `follow` and `following`

- manage the above using state management in react and when clicking the button

Users Display

Courses.jsx

- You need to create Courses component which renders the following data
 - It should have two types of courses `Full Time Courses` and `Part Time Courses`
 - Type of courses should be in `h2` tag
 - Each course will be an ordered list(ol)
 - the eligibility and duration must be an unordered list(ul) under each course.
 - refer the below image for the course details

Full Time Courses

1. Full Stack Web Development

- Eligibility : 18-28 yrs
- Duration : 30 weeks

Part Time Courses

1. Full Stack Web Development

- Eligibility : 18-28 yrs
- Duration : 30 weeks

2. Data Analytics

- Eligibility : 18-28 yrs
- Duration : 30 weeks

- follow this folder structure
